

Project Documentation: E-Commerce Growth Tracker

1. Data Cleaning (Power Query)

- Imported raw data into Excel.
- Utilized Power Query to clean and transform the dataset.
- Filtered out null values and irrelevant entries to ensure data accuracy.
- Removed the bottom row containing summary/junk data.
- Loaded the cleaned data back into Excel for analysis.

2. Data Analysis (Pivot Tables)

- Converted data into an Excel Table (Ctrl+T) for dynamic updates.
- Created five Pivot Tables to analyze key metrics:
 - **Revenue of Product:** Sales performance by product category.
 - **Historical Sales Overview:** Revenue trends over time (2023-2025).
 - **Coupon Code Impact:** Efficiency of different discount strategies.
 - **Order Lifecycle Analysis:** Tracking order statuses (Delivered, Cancelled, etc.).
 - **Payment Method Preferences:** Analyzing customer payment behaviors.

3. Dashboard Design

- Created an interactive dashboard titled "**E_COMMERCE GROWTH TRACKER**".
- Implemented various charts for visualization:
 - Bar Chart for Product Revenue.
 - Line Chart for Historical Sales trends.
 - Donut Charts for Coupon Impact, Order Lifecycle, and Payment Preferences.
- Added 4 interactive Slicers for dynamic filtering:
 - Order Status

- Coupon Code
- Payment Method
- Date (Quarter and Year)
- Optimized design by removing chart fills and outlines for a seamless, professional look.
